CONTENTS

<i>LIST OF APPENDICES</i>	v
<i>LIST OF FIGURES</i>	viii
<i>LIST OF TABLES</i>	xiv
EXECUTIVE SUMMARY	ES-1
PROSPECT ANALYSIS	P-1
INTRODUCTION	IN-1
Section 1 - EAF MELT SHOP GENERAL INFORMATION	
Electric Arc Furnaces	1-1
Number & Type of EAFs	1-1
Heats per Day	1-3
EAF Manufacturers	1-5
Decade of Start-Up of EAFs	1-6
Ladle Furnaces	1-6
Ladle Furnace Manufacturers	1-7
Heat Sizes of Ladle Furnaces	1-8
Heats per Day	1-9
Year of Start-Up	1-10
Section 2 – STEEL PRODUCTION BY EAF MELT SHOPS SURVEYED	
Steel Production	2-1
Overall	2-1
2008 Steel Production.....	2-3
Projected 2009 Steel Production	2-4
Projected Decline in Steel Production 2008 to 2009	2-6
2009 Production by Major Products	2-7
SECTION 3 – EAF MELT SHOP PRIORITIES, OPERATING PARAMETERS & PERFORMANCE	
Highest Priorities for Improvement in Performance	3-1
Electrical Power Usage	3-2
Rebar & Structural Long Products	3-2
Higher Quality Long Products	3-3
Flat Rolled Products.....	3-3
EAF Transformer Rated Capacity	3-4
Rebar & Structural Long Products	3-4
Higher Quality Long Products	3-4
Flat Rolled Products.....	3-5
Scrap Charging Method	3-5
Number of Bucket Charges.....	3-5
Does This Limit the Use of Virgin Iron Units?	3-6
Yield	3-7
SECTION 4 – THE IMPACT OF CURRENT GENERAL ECONOMIC CONDITIONS	

As We Emerge From This Crisis, What Changes in Steel Production Are Expected Compared to 2007?.....	4-1
Projected Change in Steel Production by Type of Plant	4-2
Concerns Regarding the Sustainability of Their Plant/Operation	4-3
As a Result, Are You Considering Altering Your Present Product Mix?.....	4-4
Plans to Increase Production of HSLA Steels.....	4-5
Plans to Change Major Process Equipment	4-5
The Expected Impact of Tightening Environmental Regulations	4-6
The Effects of the Various Economic “Stimulus Packages”.....	4-7
“Buy America” Incentives	4-8
Changes Anticipated in the Industry as a Whole as a Result of the Recent Economic Factors	4-9

SECTION 5 – VARIOUS CHARGE MATERIALS EMPLOYED BY THE EAF MELT SHOPS SURVEYED

Are Virgin Iron Units Required?.....	5-1
Virgin Iron Charge Limits	5-3
Iron Bearing Scrap Charge Materials Consumed by EAF Melt Shops Surveyed	5-4
Rebar & Structural Long Products	5-5
Higher Quality Long Products	5-5
Flat Rolled Long Products.....	5-6
Materials & Gases Injected in the EAF.....	5-7
Carbon	5-7
Natural Gas.....	5-8
Oxygen	5-10
Ferro Alloys (FeSi)	5-11
75% FerroSilicon.....	5-11
HC Ferro Manganese (FeMn).....	5-13
Silicon Manganese (SiMn).....	5-14

SECTION 6 – REFRACTORY WEAR MEASUREMENT

The Use or Past Investigative Activity Regarding Refractory Wear Measurement.....	6-1
Specific Type of Refractory Measurement Technology.....	6-2
Knowledge of a Technology That Monitors Refractory Wear Continuously	6-3
EAF Melt Shop Molten Metal Applications Where Refractory Erosion or Failure Causes the Most Significant Problem.....	6-4
Plants That Have a Ladle Furnace.....	6-5
Could a System That Continuously Monitors Refractory Wear Help Improve That Problem/Situation?	6-6
The Expected Benefit of Using a System That Continuously Monitors Refractory Wear.....	6-6
How Ladle Refractory Performance Could be Improved.....	6-7
Plants That Would Consider a Trial to Evaluate a Technology That Would Monitor Refractory Wear	6-7
The Benefit of Using a System That Continuously Monitors the EAF Bottom Refractory	6-8

SECTION 7 – THE USE OF INDUSTRIAL GASES & INJECTION EQUIPMENT

Industrial Gases	7-1
Industrial Gas Suppliers.....	7-1
Oxygen Consumption.....	7-2
Form of Oxygen Supplied	7-2
Consumption per Ton of Steel Produced	7-3
Annual Consumption of Oxygen	7-5
EAF Injection Equipment.....	7-7
Injection Equipment - Installation Year.....	7-8
Injection Supplier Average Performance Ratings.....	7-9
Plans or Consideration to Replace or Upgrade Injection Equipment	7-9
EAF Melt Shops with Limitations for Increasing Chemical Energy	7-10
The Reasons for This Limitation	7-11
Electric Power	7-12
Will Electric Power Rates Increase Within 3 Years?	7-12
Present Electricity Rates.....	7-12
Off-Gas Analysis	7-13
Planning or Considering Purchasing an Off-Gas Analysis System	7-13
Ladle Pre-Heaters	7-14
Number of Ladle Pre-Heaters	7-14
Would You Consider Oxy-Fuel Burners to Fuel Ladle Preheaters?	7-15

SECTION 8 – EAF TRANSFORMERS IN EAF MELT SHOPS SURVEYED

EAF Transformer Manufacturers	8-1
EAF Transformer Power Rating.....	8-2
EAF Transformer Line Voltage.....	8-4
Winding Form Design of EAF Transformers	8-5
Year EAF Transformers Were Installed	8-6
Spare EAF Transformers	8-7
Plans to Upgrade, Replace or Add an EAF Transformer	8-7

SECTION 9 – CAPACITORS IN EAF MELT SHOPS SURVEYED

Capacitors	9-1
Do You Have a Fixed Capacitor Bank Connected to the Line?	9-1
Capacitor Bank Manufacturer	9-2
Capacitor Bank Rating (MVAR).....	9-3
Capacitor Can Manufacturers	9-4
Year Capacitors Were Installed	9-5
Capacitor Bank Outside Service Provider.....	9-5

SECTION 10 – PLANS TO UPGRADE, REPLACE OR ADD ANY MAJOR PROCESS EQUIPMENT

10-1

LIST OF APPENDICES

Appendix 1: List of Plants Surveyed

Appendix 2: Person(s) Interviewed

Appendix 3: Prospect Analysis

SECTION 1 EAF MELT SHOP GENERAL INFORMATION

Appendix 4: Furnace Data

SECTION 2 STEEL PRODUCTION BY EAF MELT SHOPS SURVEYED

Appendix 5: Steel Production

SECTION 3 EAF MELT SHOP PRIORITIES, OPERATING PARAMETERS & PERFORMANCE

Appendix 6: Fundamental Priority

Appendix 7: EAF Operating Parameters & Performance

Appendix 8: General Comments Regarding EAF Melt Shop Information

SECTION 4 THE IMPACT OF CURRENT GENERAL ECONOMIC CONDITIONS

Appendix 9: Expected Changes in Steel Production Compared to 2007 Production

Appendix 10: Concerns Regarding Sustainability

Appendix 11: Changes in Major Process Equipment to Address New Product Mix

Appendix 12: Will Tightening Environmental Regulations Have an Impact?

Appendix 13: The Effect of Various Stimulus Packages

Appendix 14: The Effect of "Buy America" Incentives

Appendix 15: Changes Anticipated in the Industry as a Whole

Appendix 16: General Comments Regarding the Impact of Current General Economic Conditions

SECTION 5 VARIOUS CHARGE MATERIALS EMPLOYED BY THE EAF MELT SHOPS SURVEYED

Appendix 17: Does Your Product Mix Require the Use of Virgin Metallics?

Appendix 18: The Most Critical Virgin Metallic Elements and Max Limits

Appendix 19: Typical Charge Mix

Appendix 20: What is Injected?

Appendix 21: General Comments Regarding Scrap Charging, Scrap & Other Charge Materials Used

Appendix 22: The Use of 75% FeSi and Any Other Special FeSi

Appendix 23: The Use of HC FeMn

Appendix 24: The Use of SiMn

Appendix 25: Low Carbon SiMn (FeMnSi) Consumption and Applications

Appendix 26: General Comments Regarding the Use of FeSi Alloys

SECTION 6 REFRACTORY WEAR MEASUREMENT

Appendix 27: Whether They Have Investigated Products That Measure Refractory Wear of Thickness and What Type

Appendix 28: Do They Know of a Technology That Monitors Refractory Wear Continuously?

Appendix 29: EAF Melt Shop Molten Applications Where Refractory Erosion or Failure is Causing the Most Significant Problem

Appendix 30: Whether They Have a Ladle Furnace and if so, What Method of Stirring is Employed?

Appendix 31: Could a System That Continuously Monitors Refractory Wear Help Improve That Problem/Situation?

Appendix 32: Would They Consider a Trial to Evaluate a Technology That Would Monitor Refractory Wear?

Appendix 33: Regarding the EAF Bottom Refractory, What Being Able to Continuously Monitor the Refractory Thickness Would Allow Them to Do

Appendix 34: General Comments Regarding Refractory Wear Measurement

SECTION 7 THE USE OF INDUSTRIAL GASES & INJECTION EQUIPMENT

Appendix 37: Industrial Gas Suppliers

Appendix 38: Oxygen Usage

Appendix 39: EAF Injection Equipment

Appendix 40: Limitations in Their EAF Operation for Increasing the Use of Chemical Energy and the Reasons

Appendix 41: Expectations Regarding Any Increase in Electric Power Rates Within 3 Years

Appendix 42: Use of an Off-Gas Analysis System

Appendix 43: Number of Ladle Pre-Heaters and Whether They are Using or Would Consider Oxy-Fuel Burners to Save Natural Gas

Appendix 44: General Comments Regarding Industrial Gas Issues

SECTION 8 EAF TRANSFORMERS IN EAF MELT SHOPS SURVEYED

Appendix 45: Transformer Data

Appendix 46: Do You Have a Spare?

Appendix 47: Are There Any Plans to Replace, Remanufacture or Upgrade Any of These Transformers/

Appendix 48: General Comments Regarding Transformers

SECTION 9 CAPACITORS IN EAF MELT SHOPS SURVEYED

Appendix 49: Capacitor Data

Appendix 50: Do You Have an Outside Service Provider for Your Capacitor Bank?

Appendix 51: General Comments Regarding Capacitors

SECTION 10 PLANS TO UPGRADE, REPLACE OR ADD ANY MAJOR PROCESS EQUIPMENT

Appendix 35 – Whether They Are or Planning to Replace or Add Any Major Process Equipment

OTHER APPENDICES

Appendix 52: Survey Questionnaire

LIST OF FIGURES

INTRODUCTION

Figure 1 – Responsibilities of Persons Interviewed	IN-3
Figure 2 – Location of Plants Surveyed	IN-3
There is no Figure 3	

SECTION 1 - EAF MELT SHOP GENERAL INFORMATION

Figure 4 – EAF Heat Size in Rebar & Structural Long Products Minimills Surveyed	1-2
Figure 5 – EAF Heat Size in Higher Quality Long Products Mills Surveyed	1-2
Figure 6 – EAF Heat Size in Flat Products Mills Surveyed	1-3
Figure 7 – EAF Heat per Day in Rebar & Structural Long Products Minimills Surveyed	1-3
Figure 8 – EAF Heats per Day in Higher Quality Long Products Minimills Surveyed	1-4
Figure 9 – EAF Heats per Day in Flat Roll Products Minimills Surveyed	1-4
Figure 10 – Manufacturers' Share of EAFs in Melt Shops Surveyed	1-5
Figure 11 – Manufacturers of EAFs Installed in Plants Surveyed	1-5
Figure 12 – Decade of Start-Up of EAF Shops Surveyed	1-6
Figure 13 – Share of EAF Melt Shops with a Ladle Furnace	1-6
Figure 14 – Suppliers' Share of Ladle Furnaces in EAF Melt Shops with a Ladle Furnace	1-7
Figure 15 – Manufacturers' Share of Ladle Furnaces in EAF Melt Shops Surveyed	1-7
Figure 16 – Ladle Furnace Heat Size in Rebar & Structural Long Products Minimills Surveyed	1-8
Figure 17 – Ladle Furnace Heat Size in Higher Quality Long Products Mills Surveyed	1-8
Figure 18 – Ladle Furnace Heat Size in Flat Roll Products Mills Surveyed	1-9
Figure 19 – Ladle Furnace Heats per Day in Rebar & Structural Long Products Minimills Surveyed	1-9
Figure 20 – Ladle Furnace Heats per Day in Higher Quality Long Products Mills Surveyed	1-10
Figure 21 – Ladle Furnace Heats per Day in Flat Rolled Products Mills Surveyed	1-10

SECTION 2 – STEEL PRODUCTION BY EAF MELT SHOPS SURVEYED

Figure 22 – Total Change in Annual Steel Production by Type of EAF Shop	2-1
Figure 23 – Change in Steel Production by Type of EAF Shop 2008-2009	2-2
Figure 24 – 2008 Steel Production in Rebar & Structural Long Products Minimills Surveyed	2-3

Figure 25 – 2008 Steel Production in Higher Quality Long Products Minimills Surveyed.....	2-3
Figure 26 – 2008 Steel Production in Flat Rolled Products Minimills Surveyed	2-4
Figure 27 – Projected 2009 Steel Production in Rebar & Structural Long Products Minimills Surveyed	2-4
Figure 28 – Projected 2009 Steel Production in Higher Quality Long Products Minimills Surveyed	2-5
Figure 29 – Projected 2009 Steel Production in Flat Rolled Products Minimills Surveyed.....	2-5
Figure 30 – Projected Decline in Annual Steel Production 2008 to 2009 in Rebar & Structural Long Products Minimills Surveyed.....	2-6
Figure 31 – Projected Change in Annual Steel Production 2008 to 2009 in Higher Quality Long Products Minimills Surveyed.....	2-6
Figure 32 – Projected Decline in Annual Steel Production 2008 to 2009 in Flat Rolled Products Mills Surveyed.....	2-7
Figure 33 – Products Produced by EAF Melt Shops Surveyed Overall.....	2-7
Figure 34 – Products Produced by Rebar & Structural Minimills Surveyed.....	2-8
Figure 35 - Products Produced by Higher Quality Mills Surveyed	2-8
Figure 36 - Products Produced by Flat Rolled Plants Surveyed.....	2-9

SECTION 3 – EAF MELT SHOP PRIORITIES, OPERATING PARAMETERS & PERFORMANCE

Figure 37 – Highest Priority for Improvement in Performance in EAF Melt Shops Surveyed Overall.....	3-1
Figure 38 – Most Important Priorities for Improvement in EAF Melt Shops Surveyed by Segment.....	3-2
Figure 39 – EAF Electrical Power Consumption in Rebar & Structural Long Products Minimills Surveyed	3-2

SECTION 4 – THE IMPACT OF CURRENT GENERAL ECONOMIC CONDITIONS

Figure 48 – Changes in Steel Production Expected Compared to 2007 4-1

Figure 49 – Projected Change in Steel Production Compared to 2007 in Rebar & Structural Long Products Minimills Surveyed 4-2

Figure 50 - Projected Change in Steel Production Compared to 2007 in Higher Quality Long Products Mills Surveyed..... 4-2

Figure 51 – Projected Change in Steel Production Compared to 2007 in Flat Rolled & Other Products Mills Surveyed 4-3

Figure 52 – Expect Tightening Environmental Regulations to Have an Impact on the Plant in EAF Melt Shops Surveyed 4-6

Figure 53 – The Projected Impact of New Environmental Regulations Indicated by EAF Melt Shops Surveyed 4-6

Figure 54 – The Projected Impact of New Environmental Regulations Indicated by Type of EAF Melt Shops Surveyed 4-7

Figure 55 – Will the Various Stimulus Packages Have an Effect on the Plant / Operation / Business? (As Indicated by EAF Melt Shops Surveyed) 4-7

Figure 56 – How Will the Various Stimulus Packages Have an Effect on the Plant / Operation / Business? (As Indicated by EAF Melt Shops Surveyed)..... 4-8

Figure 57 – Industry Changes Anticipated by EAF Melt Shops Surveyed as a Result of the Recent Economic Factors 4-9

Figure 58 – Industry Changes Anticipated by Type of EAF Melt Shops Surveyed as a Result of the Recent Economic Factors 4-10

SECTION 5 – VARIOUS CHARGE MATERIALS EMPLOYED BY THE EAF MELT SHOPS SURVEYED

Figure 59 – Does the Product Mix Require the Use of Virgin Metallics by EAF Melt Shops Surveyed? 5-1

Figure 60 – Iron Bearing Charge Materials Used by EAF Melt Shops Surveyed Overall..... 5-4

Figure 61 – Iron Bearing Charge Materials Used by Rebar & Structural Long Product Minimills Surveyed 5-5

Figure 62 – Iron Bearing Charge Materials Used by Higher Quality Long Product Mills Surveyed..... 5-5

Figure 63 – Iron Bearing Charge Materials Used by Flat Rolled Product Mills Surveyed..... 5-6

Figure 64 – Rate of Carbon Injection per Ton of Steel in EAFs in Rebar & Structural Long Products Minimills Surveyed 5-7

Figure 65 – Rate of Carbon Injection per Ton of Steel in EAFs in Higher Quality Long Products Mills Surveyed..... 5-7

Figure 66 – Rate of Carbon Injection per Ton of Steel in EAFs in Flat Rolled Products Mills Surveyed..... 5-8

Figure 67 – Rate of Natural Gas Injection per Ton of Steel in EAFs in Rebar & Structural Long Products Minimills Surveyed	5-8
Figure 68 – Rate of Natural Gas Injection per Ton of Steel in EAFs in Higher Quality Long Products Minimills Surveyed	5-9
Figure 69 – Rate of Natural Gas Injection per Ton of Steel in EAFs in Higher Quality Long Products Minimills Surveyed	5-9
Figure 70 – Rate of Oxygen Injection per Ton of Steel in EAFs in Rebar & Structural Long Products Minimills Surveyed	5-10
Figure 71 – Rate of Oxygen Injection per Ton of Steel per Ton of Steel in EAFs in Higher Quality Long Products Mills Surveyed	5-10
Figure 72 – Rate of Oxygen Injection per Ton of Steel in EAFs in Flat Rolled Products Mills Surveyed.....	5-11
Figure 73 – Usage of 75% FeSi per Ton of Steel in EAFs in Rebar & Structural Long Products Minimills Surveyed	5-11
Figure 74 – Usage of 75% FeSi per Ton of Steel in EAFs in Higher Quality Long Products Mills Surveyed.....	5-12
Figure 75 – Usage per Ton of Steel of HC FeMn per Ton of Steel in EAFs in Melt Shops Surveyed	5-13
Figure 76 – Usage per Ton of Steel of Standard SiMn in Rebar & Structural Long Product Minimills Surveyed	5-14
Figure 77 – Usage per Ton of Steel of Standard SiMn in Higher Quality Long Product Mills Surveyed	5-14
Figure 78 – Monthly Usage of Low Carbon SiMn by EAF Melt Shops Surveyed	5-15

SECTION 6 – REFRACTORY WEAR MEASUREMENT

Figure 79 – EAF Melt Shops That Currently Use or Have Investigated Products That Measure Refractory Wear or Thickness.....	6-1
Figure 80 – Type of Refractory Wear or Thickness Measurement Device Investigated by EAF Melt Shops Surveyed	6-2
Figure 81 – EAF Melt Shops That Said They Know of a Technology That Continuously Measures Refractory Wear or Thickness	6-3
Figure 82 – EAF Melt Shop Molten Metal Applications Where Refractory Erosion or Failure is Causing the Most Significant Problem.....	6-4
Figure 83 – Share of EAF Melt Shops That Have a Ladle Furnace	6-5
Figure 84 – Type of Ladle Stirring in EAF Shops That Have a Ladle Furnace	6-5
Figure 85 – Could a System That Continuously Monitors Refractory Wear Help Improve That Problem/Situation?	6-6
Figure 86 – How a System That Continuously Monitors Refractory Wear Could Help Improve That Problem/Situation	6-6
Figure 87 – How a System That Continuously Monitors Refractory Wear Could Help Improve Ladle Refractory Performance	6-7
Figure 88 – EAF Melt Shops That Would Consider a Trial of the Refractory Wear & Thickness Monitoring Technology	6-7

Figure 89 – The Benefits of Being Able to Continuously Monitor Refractory Thickness in the EAF Bottom.....	6-8
--	-----

SECTION 7 – THE USE OF INDUSTRIAL GASES & INJECTION EQUIPMENT

Figure 90 – Current Industrial Gas Supplier Identified by EAF Melt Shops Surveyed.....	7-1
Figure 91 – The Form of Oxygen Available to the EAF Melt Shops Surveyed.....	7-1
Figure 92 – Oxygen Consumption (Per Ton of Steel) in Rebar & Structural Long Products EAF Minimills Surveyed.....	7-3
Figure 93 – Oxygen Consumption (Per Ton of Steel) in Higher Quality Long Products EAF Melt Shops Surveyed.....	7-4
Figure 94 – Oxygen Consumption (Per Ton of Steel) in Flat Rolled Products EAF Melt Shops Surveyed.....	7-4
Figure 95 – Oxygen Consumption by Industrial Gas Supplier (2009).....	7-5
Figure 96 – 2009 Oxygen Consumption by Rebar & Structural Long Product EAF Minimills Surveyed.....	7-5
Figure 97 – 2009 Oxygen Consumption by Higher Quality Long Product EAF Mills Surveyed.....	7-6
Figure 98 – 2009 Oxygen Consumption by Flat Rolled Product EAF Minimills Surveyed.....	7-6
Figure 99 – EAF Injection Equipment Supplier Installed in EAF Melt Shops Surveyed.....	7-7
Figure 100 – When Injection Equipment was Installed in EAF Shops Surveyed.....	7-8
Figure 101 – When Injection Equipment was Installed in EAF Shops Surveyed by Supplier.....	7-8
Figure 102 – Average Ratings of Injection Equipment Suppliers by EAF Shops Surveyed Overall.....	7-9
Figure 103 – EAF Melt Shops That are Considering or Planning to Upgrade or Replace Injection Equipment in the Next 3 Years.....	7-9
Figure 104– EAF Melt Shops That Indicated Limitations in Their EAF Operation for Increasing the Use of Chemical Energy.....	7-10
Figure 105 – Reason for Limitation Indicated by EAF Melt Shops Surveyed.....	7-11
Figure 106 – EAF Melt Shops That Anticipate or Expect an Increase in Electric Power Rates Within 3 Years.....	7-12
Figure 107 – Electricity Costs for EAF Shops Surveyed.....	7-12
Figure 108 – EAF Melt Shops That Presently Use an Off-Gas Analysis System.....	7-13
Figure 109 – Number of Ladle Pre-Heaters Operated in EAF Melt Shops Surveyed.....	7-14
Figure 110 – EAF Melt Shops That Would Consider Oxy-Fuel for Their Ladle Pre-Heaters to Save Natural Gas.....	7-15

SECTION 8 – EAF TRANSFORMERS IN EAF MELT SHOPS SURVEYED

Figure 111 – Manufacturers’ Share of EAF Transformers Operated in Melt Shops Surveyed 8-1

Figure 112 – Power Capacity Rating of EAF Transformers in Rebar & Structural Long Product Minimills Surveyed 8-2

Figure 113 – Power Capacity Rating of EAF Transformers in High Quality Long Product Mills Surveyed 8-3

Figure 114 – Power Capacity Rating of EAF Transformers in Flat Rolled Product Mills Surveyed..... 8-3

Figure 115 – Line Voltage of EAF Transformers in Rebar & Structural Long Product Minimills Surveyed 8-4

Figure 116 – Line Voltage of EAF Transformers in Higher Quality Long Product Mills Surveyed..... 8-4

Figure 117 – Line Voltage of EAF Transformers in Flat Rolled Product Mills Surveyed..... 8-5

Figure 118 – Transformer Electrical Design Form..... 8-5

Figure 119 – When Transformers Were Installed in EAF Melt Shops Surveyed 8-6

Figure 120 – When Transformers Were Installed in EAF Shops Surveyed by Type of Plant..... 8-6

SECTION 9 – CAPACITORS IN EAF MELT SHOPS SURVEYED

Figure 121 – EAF Melt Shops That Have a Fixed Capacitor Bank..... 9-1

Figure 122 – Capacitor Bank Manufacturers Identified as Installed by EAF Melt Shops Surveyed Overall 9-2

Figure 123 – Capacitor Bank Manufacturers Identified as Installed by EAF Melt Shops Surveyed by Type of Plant 9-2

Figure 124 – Fixed Capacitor Bank Rating in Rebar & Structural Long Product Minimills Surveyed 9-3

Figure 125 – Fixed Capacitor Bank Rating in Higher Quality Long Product Mills Surveyed..... 9-3

Figure 126 – Fixed Capacitor Bank Rating in Flat Rolled Product Mills Surveyed 9-4

Figure 127 – Capacitor Can Manufacturers Identified as Installed by EAF Melt Shops Surveyed Overall 9-4

Figure 128 – When Capacitor Cans Were Installed in EAF Melt Shops Surveyed..... 9-5

Figure 129 – The Share of EAF Shops Surveyed That Uses an Outside Service for Their Capacitor Banks..... 9-5
