The data for the map was provided by the SFSA (Steel Foundry Society) and is the most up-to-date data that they have available at the time of publishing.

These maps include the following data:

1. Each pin location is color coated to indicate the type of melting and refining furnaces employed – Electric Arc, Induction, AOD, and ladle furnace. The listing indicates the number of each type of furnace, as well.
2. The listing indicates the grades produced, mold process employed, the size of the largest size casting produced, and the monthly production capacity.
3. This map shows the locations of 356 steel foundries in the U.S., Canada & Mexico. It also identifies those foundries that are members of the Steel Foundry Society of America, including 10 member foundries that are located outside North America. All the data shown on this map was provided by the SFSA.
4. Current Plant Status (To Be Constructed, Under Construction, Active, Idle, Closed)
