					85	Windsor Metal Finishing	Kissimmee	5P	V

3-AAMA 2603-20 - Baked Enamels, 4-AAMA 2604-20 - 50% Kynar 500, 5-AAMA 2605-20 - 70% Kynar 500

We are pleased to inform you that we have published a new map listing and showing the location of Independent Extrusion Coaters of North America. In addition, we can provide a separate spread sheet listing key contacts at these operations. This map would be useful resource for extruders that need to outsource their coating requirements. Having the flexibility to utilize a variety of outside resources for customer required supplementary coating services can provide a competitive advantage.

This map provides a listing and shows the locations of Coating Operators, particularly those that specialize in coating extrusions. The map characterizes the types of coatings they provide, such as, wet paint, powder or anodizing. The wet paint capability is further characterized according to whether they conform to AAMA 2603, 2604, and 2605 certification.

This listing below the map includes the company name, city, state, and country location of 78 coaters in the US and Canada. Of the 78 locations, 14 are in Canada and 64 are in the U.S. Of the 78 locations, 36 acknowledged offering AAMA certified paint and 25 others for which we did not determine if they comply with AAMA certification. Of the 78 locations, 44 do powder coating and 30 do anodizing. The U.S. states or Canadian provinces with the most locations are California (7), Florida (7), Minnesota (6), Indiana (6), and Ontario (7). Most of these coaters typically coat aluminum, and particularly, aluminum extrusions.

I am attaching a sample of this map. The resolution in this sample is low to keep the file size small. The resolution of the actual poster map is 300 dpi.

In addition, we can provide an excel spread sheet that includes complete company addresses, phone numbers, and names, titles and email addresses of key contacts at these coater operations. A sample of this spread sheet is attached to this email. **The fee for this spread sheet is \$350.**

The map is \$200. There is a \$5 fee for shipping/packaging and an additional 5% fee for payments made by credit card. The standard size of the map poster is 18"X 24". Larger sizes must be quoted and are only printed on order.

As a combination, one copy of the map and excel spread sheet can be purchased for a **package price of \$500.**

Orders may be placed by simple return email or phone call to 412-366-7778, indicating:

- The number of maps required: ___
- ___ Indicating whether you also wish to also purchase the excel contacts spread sheet.
- Your mailing address: _____
- If you wish to pay by credit card, advise your Credit card number: _____, expiration date : _____, and customer code _____
- Or mail us a check with the ship-to address.

On request, we will send you an invoice to facilitate initiating the payment or an invoice marked "paid" once we receive your payment.

We are also attaching a list of other available maps. We have published new editions of our Steel Plant Map, Pickling Line Map and Hot Strip & Plate Mills Map, Metallic Coating (Galvanizing) Lines Map, Coil Coating Map, and Extrusion Lines Map of North America, Remember, multiple map orders receive a 20% discount. If you order 3 or more maps, we discount 30%.
