The Extrusion Coaters' map includes the company name, city, state, and country location of 78 coaters in the US and Canada. Of the 78 locations, 14 are in Canada and 64 are in the U.S. Of the 78 locations, 36 acknowledged offering AAMA certified paint and 25 others for which we did not determine if they comply with AAMA certification. Of the 78 locations, 44 do powder coating and 30 do anodizing. The U.S. states or Canadian provinces with the most locations are California (7), Florida (7), Minnesota (6), Indiana (6), and Ontario (7). Most of these coaters typically coat aluminum, and particularly, aluminum extrusions.

There are over 600 extrusion presses in operation in the locations listed. Of the 230 locations listed, 220 or 95% indicate the number of extrusion presses in operation.

In addition to characterizing the types of coatings that these extruders apply, we indicate the number of extrusion presses they operate and the circumscribed circle diameters processed on these presses.

We can provide a sample of the spread sheet. It includes complete company addresses, phone numbers, and names, titles, and email addresses of key contacts. The fee for the Aluminum Extrusion spread sheet is \$500.

The Aluminum Extruders' map is \$300. There is a \$7 fee for shipping/packaging and an additional 5% fee for payments made by credit card. The standard size of these map posters is 18"X 24". Larger sizes must be quoted and are only printed on order.
