We are pleased to offer you our new 2023 Steel Pipe & Tube Plant Map of the U.S. and Canada. A sample is attached.

This new 2023 edition of the Steel Pipe & Tube Plant Map includes 226 manufacturing plant locations where they produce steel pipe and tube. The map includes:

1. The map indicates numbered locations which refer to a listing below the map.
2. The listing is organized by three types of pipes or tubes produced; Seamless, Welded Tube (ERW and others), and Submerged Arc Welded (Spiral and Large Diameter Longitudinal Straight Seam)
3. The listing is organized by company name; and plant and city, state, and country (if Canada) locations alphabetically. The U.S. and Canadian plants are color coded, respectively.
4. The listing indicates the Pipe or Tube capacity (tons per year) of many plants
5. The listing indicates the Outside Diameters (Minimum & Maximum) of pipe or tube produced at each location in inches and or mm.
6. Zoom boxes magnify areas with a cluster of plant locations.

We also add comments regarding the status of plants that are planned to be constructed or operated in the future or are idled or closed.
